

## Update Instructions

### ATMS CORE Standalone Systems

- Copy the Update File:
  - Copy the update file to the default folder: C:\ATMS.CORE Installationssoftware\ATMS.CORE.Update.
- Run the Update:
  - Navigate to the default installation folder.
  - Double-click on the ATMSCORE-Update-Versionnumber.exe file to initiate the update.
  - Follow the on-screen instructions to complete the update process.

Note: Local administrator rights are required to run the update. Please ensure you have these rights before starting the update, or contact your IT administrator for assistance.

### ATMS CORE SERVER Systems & Clients

Note: Customers are not permitted to update ATMS CORE SERVER Systems & Clients independently.

These updates must be performed by the Achterberg Support team to ensure proper configuration and system integrity.

- Contact Support:
  - To schedule an update for your ATMS CORE SERVER and its associated clients, please contact TCM Support via email at [Service@Achterberg-GmbH.de](mailto:Service@Achterberg-GmbH.de).
- Assistance and Scheduling:
  - Our support team will coordinate with you to plan and execute the update, ensuring minimal disruption to your operations.

## System Requirements

### Supported Operating Systems:

- Windows 10: Minimum 8 GB RAM
- Windows 11: Minimum 16 GB RAM

### Supported MS SQL Server Versions:

- For ATMS CORE Standalone Systems:
  - SQL Server / SQL Server Express 2017 – 2022
- For ATMS CORE SERVER Systems:
  - SQL Server 2017 – 2022

### Required Software:

- Microsoft .NET Framework: Version 7 or higher

### Hardware Requirements:

- Refer to the PC requirements documentation for ATMS CORE and ATMS CORE SERVER or contact TCM Support for detailed hardware specifications.

## New features

- New Filling Shopping Cart for Manual Devices

*ATMS CORE now supports a dedicated filling shopping cart, enabling users with the appropriate permissions to collect and process filling orders across manual devices efficiently. Items can be added by selecting the article, reviewing current stock and maximum stock levels, and specifying the required quantity. The cart is automatically saved under the logged-in user's name and persists across sessions. Once ready, all items can be filled in one step without individual compartment confirmation, with stocks adjusted and bookings written automatically. A new shopping cart selection menu allows authorized users to manage and execute both filling and withdrawal carts centrally.*

- Centralized Selection and Handover of Withdrawal Shopping Carts

*ATMS CORE now provides authorized users with a central withdrawal shopping cart selection, enabling teams to share and hand over shopping carts across users. A dedicated menu lists all available withdrawal shopping carts — including those created by other users — allowing any authorized team member to pick up and process a cart. The system automatically validates quantities before processing and displays an error if the removable quantity is less than the amount in the cart. Cost center selection is included in the workflow. As before, each user's own shopping cart is automatically displayed upon login.*

#### Bug Fixes

- Stable Supplier Data Export After Import

*Exporting supplier data in ATMS CORE now works reliably after a prior data import of the same type. Previously, performing an export under these circumstances could cause an unexpected logout. This has been resolved, ensuring a stable and uninterrupted workflow when working with supplier data import and export.*

- Reliable File Output for ATMS CORE Interfaces

*ATMS CORE interfaces now consistently generate complete and valid output files. Previously, certain interface processes could produce empty files under some circumstances. This has been resolved, ensuring that all generated files contain the expected data.*

- Configurable Format for CSV File Exports

*CSV files generated by ATMS CORE can now be produced in a defined format. This ensures greater compatibility with external systems that rely on consistent file structures. If you experience any issues with CSV file formats in your environment, please contact our support team.*
