

Software module ATMS CORE FULL

ATMS CORE Module FULL

Expansion to ATMS CORE module BASE

- Loan tool and measuring equipment management including test intervals with automatic blocking per ID number and query of reasons for return. Simplified shift handover of loan tools, item search via ID number.
- Used item management
- Regrinding management including return of blunt tools with reason for change query, tool life and grinding service document (a standard printer from the customer is also required)
- Machine management with cost center filter, user group / user filter and department / item / parts list filter
- SAP scan when withdraw items
- Serial number management (per individual storage location) of items
- Inventory query to other Toolbase systems in the same network segment
- Management of additional information per storage location
- Customer export/import module for master data, offers the possibility to manually export and import master data for maintenance on the system in XLSX format. This is possible for the following master data areas: User groups (only name), users, suppliers, items, product groups, parts lists, machines, cost center I + II, subjects (only article assignment and visualization).
- Query of order numbers including comparison with an import list from the customer
- Query of a withdrawal reason from a list or with free text input
- Evaluations, freely definable + graphic evaluations
- Individual limitation of the quantity of items at withdrawal per item and user group / user
- Create and manage parts lists and link accessories to articles
- Management of buffer stores
- Reservation of items for users over a defined period
- User inventory management, display of the removed items / open stocks (in addition to loan tools) based on the users in the status window

- Management of manual cabinets via the controlled issue of cabinet keys, Key issuance possible via type EL with or without flap, EK, EB and AR
- Definition of a follow-up items with change to the follow-up item with zero stock
- Send orders via FTP/FTPS
- 1x ATMS CORE external access, for external administration for one user via web browser
