

Software module ATMS CORE “Cloud”

ATMS CORE module “Cloud“

Server version without master data maintenance

The basic requirement is the license module ATMS CORE “Cloud-License”

- Manage several Toolbase systems as a service via a central cloud with different clients and the same master data
- Management of the master data via a web interface ATMS CORE CLOUD NET
- Server service only, without ATMS CORE user interface for removal / filling etc.
- All functions of ATMS CORE module “Base”
- All functions of ATMS CORE module “Full”
- All functions of ATMS CORE module “Interfaces”
- All functions of ATMS CORE module “External”

Additional hardware and software products may be required for the software functions. These are not included in the software module and must be requested separately from Achterberg.

Additional technician hours may be required to set up the cloud module. These are not included in the software module and must be ordered separately. This support can be requested from Achterberg.
